

## Tricky areas cellulite stick

---

Cod.1459

### Features

A revolutionary anti-cellulite stick formula, for a quick and practical application on rebel areas affected by cellulite. Its particular texture, quickly absorbed, doesn't need any massage. Apply and leave to act. A new way to effectively fight cellulite.

### Actives

- **Nyco-Menthyl®:** this new active ingredient is a direct vasodilator and has an effective action on the microcirculation, allowing better skin oxygenation. At the application, it provides a pleasant and mild sensation of stimulating heat-cold.
- **Garcinia Cambogia:** it is a woody plant native to the Asian regions. Its properties are given by an extremely rare hydroxycitric acid in nature, which acts on the synthesis of fats, reducing them.
- **Extract of the Bitter Orange flower:** rich in flavonoids, it acts on the microcirculation facilitating the disposal of fats.
- **Caffeine:** recognized as one of the essential ingredients in anti-cellulite products for its remarkable "anti-accumulation" properties, able to stimulate the drainage of excess liquids.

### Action

Effectively counteracts the accumulation of fat cells that characterize the appearance of cellulite. Thanks to its active pool, it acts deeply improving the skin tissues. It reduces localized roundness, fights the most rooted cellulite by refining the skin and improving its functionality.

### Use

Apply on the affected areas (hips, buttocks, inner thighs and arms) starting from the bottom up. We recommend applying it after a bath or shower, when the pores are dilated; in this way the hot-cold sensation is felt more strongly. Don't massage.
