

METALLIC MASK - face illuminating

Cod. 1802

Features

An enveloping and greedy texture like a spreadable cream, to give an instant brightness to the skin and make it soft and compact at the same time.

Actives

This face mask can be enriched with nourishing and anti-aging ingredients to counteract the signs of aging and restore the splendor of youth to the skin.

Action

Conceived for a gradual release of the assets, it is particularly indicated for an evening use so as to carry out its action during sleep, the most favorable moment for cellular skin exchanges.

Moisturizes, and smoothes the skin, improving tone and elasticity. Upon awakening, it makes the epidermis particularly luminous and homogeneous.

Its particular «memory» texture creates a uniform and compact layer that adapts to the face shape and doesn't drip.

Use

In the evening, apply a thick layer of mask all over the face avoiding the eye contour. Leave on for 10-15 minutes then remove the excess (but not all) with a tissue gently dabbing.

Spread the product left as a normal night cream, starting from the center of the face outwards, applying it to the neck and décolleté. We recommend using it once or twice a week.

It can also be applied with the help of a brush with synthetic bristles.
