

BODY DRAINAGE STICK

Cod. 2867

Features

A revolutionary stick-draining formula, for a quick and practical application in the rebel areas involved. Its particular texture, quickly absorbed, does not need any massage. Apply and leave acting: from today there is a new way to affectively fight cellulite.

Active

- **Caffeine:** recognized as one of essential ingredients in anti-cellulite products for its remarkable "anti-accumulation" properties, able to stimulate the drainage liquids excess.
- **Actigym:** A new active ingredients generation derived from marine biotechnology, useful for redefining sensitive areas of skin relaxation such as the abdomen, arms and thighs. It induces the adiponectin from adipose tissue, improving the metabolism of muscle fibers.
- **Nyco-Menthyl®:** this new active is a direct vasodilator and has an effective action on microcirculation allowing a better skin oxygenation. Upon application, it provides a pleasant and mild sensation of stimulating heat-cold.

Action

A real shock treatment, which thanks to its active ingredients pool acts deeply improving the skin tissues. It drains the affected areas, effectively counteracting the accumulation of fat cells that characterize the appearance of cellulite. The epidermis will be firmer and more elastic.

Use

Apply to the affected areas (hips, buttocks, inner thighs and arms) starting from top to bottom. We recommend applying after a bath or shower, when the pores are dilated; in this way the hot-cold sensation is felt more strongly. Do not massage. Two passes are sufficient for each area to be treated, not excessive use.
