

## BIPHASIC WATER

### Toning & anti-cellulite

---

Cod. 2849

### Features

Its biphasic texture is designed for those who have problems of cellulite or adiposity associated with water retention. This product reactivates the microcirculation, which is why it represents a lasting solution in combating cellulite.

### Actives

#### In the idrosoluble phase:

- **Chloride:** its osmotic action helps eliminate excess liquids.
- **Slimastevia** reduces signs on the body and stimulates lipolysis.
- **Green Coffee** has a toning and reducing effect.

#### In the liposoluble phase:

- **Plant extracts** that help to counteract water retention and drain excess fluids, improving circulation.
- **Sweet almond oil** with emollient, nourishing, moisturizing and soothing properties.

### Action

Drains, tightens and reshapes.

Two phases that act in synergy for an effective and targeted result against the cellulite imperfections. The Dead Sea salt gives a feeling of compactness, makes the fabrics more tone and elastic. It favors cutaneous microcirculation and eliminates excess liquids and impurities. Its active plus also counteracts the elasticity loss, ensuring a healthy and toned skin.

### Use

Shake before using. Spray the product directly on the affected body part. The skin must be clean and dry. The active plus ingredients included in the formula guarantee an immediate draining and firming action.

Leave to act without rinsing.
