

Moisturizing face cream

Cod. 1461

Features

A soft, melting, moisturizing cream that slides on the skin and absorbs quickly. Indicated mainly for normal and dehydrated skin.

Actives

- **Chromabright:** has a specific action on melanin synthesis (it inhibits the action of tyrosinase, enzyme that catalyzes the first two synthesis reactions) and effectively prevents skin damage caused by UV rays. Provides a progressive lightening skin effect.
- **Vitamin C:** energizing and antioxidant
- **92% natural origin ingredients**

Action

Thanks to the mixture of its effective active ingredients, ensures a perfect moisturizing action. It respects the skin hydrolipidic film, guaranteeing an optimal hydration rate. Protects the epidermis from external aggressions, making it soft, elastic and resistant, thus counteracting the formation of small wrinkles caused by dehydration. Its whitening effect formula prevents brown spots from appearing. **(Efficacy test available)**

The result is a balanced and vital skin, which rediscovers all the splendor of its natural brightness.

Use

Apply small touches of cream on cheeks, forehead and chin, then spread the product from the center of the face outwards until completely absorbed. Continue the application on the neck and décolleté.
