

## Hand cream

---

Cod. 1738

### Features

A beauty treatment specially designed to have soft and well-groomed hands.

### Actives

- **Trealose:** is a unique molecule in nature with extraordinary moisturizing virtues. On the skin, it creates a protective film against free radicals and pollutants.
- **Chromabright:** has a specific action on melanin synthesis (it inhibits the tyrosinase action, enzyme that catalyzes the first two synthesis reactions) and effectively prevents skin damage caused by UV rays. Provides a lightening skin effect.

### Action

Its rich but light texture blends on the skin ensuring optimal protection against dryness and external agents.

Stores a light and non-fat film that wraps the skin and counteracts signs of skin aging.

Its whitening effect formula prevents brown spots from appearing.

#### **(Efficacy test available)**

Fast absorption, non-greasy and non-sticky. It makes the skin soft and silky.

### Use

Apply daily and whenever you feel the need. Make a light massage until completely absorbed, insisting on nails.

In case of increased dryness, it is recommended to use it as a night mask, applying a thicker layer and letting it act by covering the hands with cotton gloves. Upon awakening, the skin will be soft and extremely velvety.
