HAND SANITIZING SOAP WHIT ANTIBACTERIAL

Cod. 3315

Features

A soap to sanitize the hands without altering the skin pH. The product created with active ingredients of natural origin and suitable for the whole family.

Attivi

- **Pentavitin:** 100% natural origin, it is a sugar obtained from a corn fermentation process. It offers a protective action from external agents and bacteria that can cause irritation and imperfections. Activates the skin microbiome biodiversity and increases the skin hydration to restore a healthy and vital appearance
- **Iscaguard VIR** ensures an antibacterial, antimicrobial, fungicidal, anti-spore action to effectively fight skin germs
- **AM Hebeitol Plus Deo:** an antibacterial agent, useful for counteracting the bad smell formation caused by germs and bacteria

Action

The soap which, thanks to its natural origin ingredients, guarantees a perfect antibacterial action. Its effectiveness is given by an active ingredient mix that combines the science and nature to ensure an elevated action against germ and bacteria. In addition, the formula does not alter the skin pH, making it soft and delicately scented.

Use

Apply the required product amount on wet hands. Massage until a gentle foam is formed, to allow a greater hand cleansing. Rinse off water.
