SANITIZING HAND CREAM WITH ANTIBACTERIAL

Cod. 3316

Features

The hands are severely tested by the continuous washing with soap and gel, for this reason they need to find a soft and velvety appearance, but at the same time effectively protected.

Attivi

- **Genencare:** extracted from sugar beet, a monohydrate and natural betaine, which protects cells from stress and dehydration. Ensures a moisturizing and protective action
- **Pentavitin®:** 100% natural origin, it is a sugar obtained from a corn fermentation process. It offers a protective action from external agents and bacteria that can cause irritation and imperfections. Activates the skin microbiome biodiversity and increases the skin hydration to restore a healthy and vital appearance
- **Am Hebeatol Plus Deo:** an antibacterial agent, useful for counteracting the bad smell formation caused by germs and bacteria
- **Iscaguard VIR:** ensures an antibacterial, antimicrobial, fungicidal, anti-spore action to effectively fight skin germs
- **Sweet Almond oil:** known for its emollient, softening, nourishing and soothing properties. It has a moisturizing action and helps to counteract skin aging

Action

The rich but light texture melts into the skin ensuring optimal protection against dryness and external agents. It deposits a light, non-greasy film that wraps the epidermis and counteract skin dryness. In addition, its active ingredients mix combines science and nature to ensure a high action against germs and bacteria and the same time nourish the skin. Quickly absorbed, non-greasy and non-sticky, giving a comfort feeling.

Use

Apply the required product amount on dry hands. Massage and spread the cream well, insisting on the driest areas, such as the back of the hands. Its texture dries quickly without leaving a trace, but giving an immediate comfort feeling.
