Features

91.4% NATURAL INGREDIENTS

NO SILICONES

VEGAN-FRIENDLY

OCEAN FRIENDLY SOLAR FILTER

The pigments used are 100% natural and COSMOS certified.

Six4All: no longer a simple foundation.

Over 40 years of skincare expertise at the service of revolutionary foundation.

A **foundation** that meets the needs of all those who want a product that **adapts perfectly** to their complexion and simultaneously **acts on the skin moisturizing and smoothing it** without an heavy skin feeling.

A formula to wear 24 hours a day for a comfortable and long lasting result.

6 shades that create infinite tailor-made combination to adapt any complexion type and colour.

Combined with Magic Basic, they allow you to accurately modulate the final shade colour for a **natural and completely personalized result**.

Its formula helps to strengthen the skin barrier with a specific action on the **skin microbiome** and to prevent the harmful effects of **blue light** by contrasting the action of free radicals.

Benefits

The soft and fluid texture glides and melts on the skin for a perfect matte and long lasting result.

The skin is elastic and soft thanks to the presence of 20% of emollient oils such as Avocado Oil and Shea Butter.

The sun filters and the active against blue light slow down the skin aging process so that skin appear toned and bright.

It gives the skin a new dimension of complexion, with a natural and radiant appearance.

Active ingredients

20% EMOLLIENT OILS - AVOCADO OIL AND SHEA BUTTER: envelop the skin like a soft caress and nourish it to restore softness and elasticity

EMULIUM ILLUSTRO®: ensures high long-lasting sealing performance by hydrating and uniforming the skin

BIOECOLIA: it nourishes the microbiota, facilitates microbial passage and strengthens the skin's natural defenses to preserve its ecosystem

PENTAVITIN®: a 100% natural active (derived from corn) capable of absorbing, like a magnet, the water on the skin surface and keeping it for a long time to avoid skin dehydration. It stimulates the Keratinocytes production and acts as a shield for external agents that attack the epidermis

OXYGENSKIN: it fights the damages caused by exposure to blue light. It strengthens the skin barrier by increasing hydration, smoothes fine lines and improves skin uniformity

SOLAR FILTERS: for a delicate protection against the sun light; filters ocean friendly

How to use

With brush: apply light touches of product to cheeks, forehead and chin and smooth from the center of the face outward until the result is uniform opaque over the entire face.

With sponge: use the silicone type. The application method is similar to application with the brush but, may require different attention depending on the type of sponge used (flat or shaped). Spread the product by dabbing lightly until an uniform result is achieved.

With fingers: faster and more practical technique for a natural final effect.

Apply a few foundations drops on the face (forehead, cheeks, chin) and spread with the fingertips with gentle movements from the inside outwards. Make sure to blend well the product on the nostrils, near the hairline and from the jawline towards the neck to prevent colour splits.
